

**Recreational Sports and Services Advisory Board  
Report to the A/P Staff Council**

**Rod Sievers  
Dec. 18, 2013**

Updates:

Roof work now completed

Still some issues with the new HVAC system...for example, more insulation is needed in some areas to prevent condensation...However, all work on this \$4 million project should be finished by the end of the year.

New washers and dryers installed – a \$36,000 project.

Inclusive changing areas have been well-received...those areas being monitored by students to help with customer relations and security issues.

Adding new signage in the building.

Looking at options for plans to update the saunas

Plans are under consideration to renovate/replace the Campus Lake boat docks.... finding the money is the big issue.

The climbing wall in the Rec is under renovation...will totally be re-done...more challenging...safer.

The Rec trying to do more with less when it comes to the budget. Will not ask for a student fee increase this year. Some classes and programs now charge fees for the individual user.

If you have concerns, suggestions for improvement, or general comments, let me know, and I'll bring them up at the next Board meeting.
